

L'ART DU SOIN

A NEW ART
OF EXPERIENCING
SKINCARE

Through this range of products, the Maison invites you to discover new experiences.

The skincare ritual emphasizes luxurious textures and the benefits of self-care, while also incorporating the beautiful scents that diptyque is known for.

A range of different textures – lotion, balm, oil, solid wax or water – the products transform on the skin during use: nourishing cleansing balm becomes first an oil, then a lotion; radiance boosting powder changes from a powder to a foam; essential face cream turns into an immersion of freshness all as if by magic. diptyque products continue to evolve – including the latest addition to the body care range. Soft lotion with jasmine extracts – first creamy, then fluid when applied – creates an immediate sensation of softness.

Fragrance is an integral part of the skincare experience. Essences of blood oranges, of rose and iris petals, of violet and of jasmine, combine intricately in a tactile experience. Fragrances remind us that these products are linked with a Maison with nomadic inclinations, evoking memories of the Mediterranean landscapes so dear to diptyque.

Facial care products are based on the principle of Infused Cosmetics. This is deeply rooted within the history of diptyque, which has been a perfumer since 1961 and has a deep knowledge of nature's benefits.

The Maison takes inspiration from the traditional expertise of perfumery, innovating and drawing on nature and absorbing its beneficial elements.

OF A PARTICULAR NATURE

Perfume plants are used as “raw materials”, selected for their moisturizing, nourishing, smoothing, antioxidant or regenerative qualities. Each is extracted using slow infusion techniques inspired by ancient practices: distillation, aqueous or oily maceration, softening them into a mash in order to preserve their active properties.

For its most recent creation, diptyque has once more drawn on the history of perfumery, taking inspiration from the process of enfleurage to produce its own active ingredient: Floracera. This modern, patented enfleurage technique, known as oléo-éco-extraction, allows us

to capture the powerful antioxidant properties of the jasmine flower in a smoothing, regenerating jojoba wax. Floracera is the active ingredient at the heart of the new Infused face serum which has strengthening, regenerating and smoothing properties. Its solid texture is transformed into a layer of freshness on the skin, allowing the user to achieve an exceptional skincare experience simply by massaging the skin.

In 2020, diptyque remains committed to offering skincare products free from any controversial ingredients.

SINCERE BEAUTY

This is why we have gone further than European legislation, which itself currently imposes the most stringent checks and tests on skincare in the world. We are saying goodbye to phthalates, parabens, TED/DEA, silicones, aluminum, mineral oils, synthetic colors and sulphates. A new day is also dawning when it comes to bottling, with generously proportioned refillable glass containers that become lasting decorative items for the bathroom. Our Softening Hand Wash and Velvet Hand Lotion are already sold in this format, and the collection will be augmented by an Exfoliating Hand Wash enriched with olive stones to cleanse and soften the hands. This intricate interplay between beauty and usefulness reveals a move towards a modern aesthetic, and the result is a sincere art of skincare.

A true connoisseur and lover of nature's kingdom, diptyque uses innovation in an easy, natural manner. With an appetite for creativity and strong roots both in its own history and in the present day, the Maison is focused on exceptional beauty, offering its customers an art of experiencing skincare.

RITUAL L'ART DU SOIN
